| QA | Javier Hidalgo | | |

by **Andres Delgado** on **Fri, 26 Feb at 9:36 AM** via **Phone****V3_11_03** No se guarda el cambio de numero telefonico en preferencias app

The screenshot shows the Afx app registration form on the left and the browser console on the right. The form fields are: Distrito Capital (checked), Ciudad / Municipio de Registro (1) Caracas (checked), Código Postal (1) 1010 (checked), Teléfono (1) 584242304075 (with a red error icon), Sitio Web Afx.Trade (checked, optional), and Número de Socios (1) 1 (checked). At the bottom are buttons for REGRESAR, COMPLETAR LUEGO, and CONTINUAR. The browser console on the right shows multiple 'Failed to load resource: the server responded with a status of 500 (Internal Server Error)' messages for the endpoint `/~afxuser/prd/app/ao-updatecompany.php`. The messages are grouped by the browser, showing several instances of the same error. The console also shows a successful POST request to `http://totalsoftware.com.ve/~afxuser/prd/app/aoi/use_main.js?v=9:80` with a 200 status.

En el modulo app, intentando cambiar un numero de telefono para probar el id2 del sprint 11
